*With the stabilization of the supply chain, abundance of raw materials and less volatility we are excited to be able to bring pricing back into our domestic catalogs. Allowing our suggested MSRP to be in the hands of the superintendents and our distributor sales staff will allow for smoother and more efficient transactions. Further, our Board is excited at the continued success of our GreenActivator throughout the golf and sports turf markets. This innovative product continues to gain market share and proves Standard's mission to assist the superintendent in growing the best turf.*

# BUNKER RAKES COMPARISON

## THE CHIEF

Designed by a golf course superintendent to be used with the "Aussie Style" of bunker maintenance. This tine-less or "toothless" rake has two sides, a smooth side to help pack down the vertical sides of a bunker, and a side with ridges to rough up the bottom of the bunker without leaving large grooves in the sand.

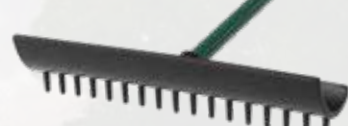

- ▶ 20" (51 cm) rake head will come with one of 3 handle sizes, Green 54" (137 cm) Aluminum, 60" (152 cm) Green Gator Grip or 72" (183 cm) Green Gator Grip.
- ▶ Single tapping screw (included) is all you need for assembly.

## TOUR PRO™

The stronger, lighter material has tines to help move deep sanded bunker sand into place. Flip over and the ridges smooth the playing surface without leaving the sand compacted and flat. Less expensive and a wider coverage than many of its competitors.

- ▶ 20" (51 cm) and 25" (63 cm) heads ensure tracks are covered with minimum effort, while pioneering design generates tournament quality surfaces
- ▶ When durability is a must, the exclusive Gator Grip handle is your best option, available in both 60" (152 cm) and 72" (183 cm) lengths. Also available with 64" (162.5 cm) curved aluminum and 54" (137 cm) composite handles.
- ▶ A single self-tapping screw (included) is all you need for assembly.

## TOUR SMOOTH™ II

Performance of the original Tour Smooth Bunker Rake just got an upgrade. Improved rake assembly and the addition of the exclusive Gator Grip handle makes the Tour Smooth™ II a must for all courses.

- ▶ Smooths both fine and course sand into perfect playing conditions quickly and easily
- ▶ Pair the Tour Smooth™ II with the exclusive 60" (152 cm) Gator Grip handle for a level of performance unmatched by any of the competitors
- ▶ A single self-tapping screw (included) is all you need for assembly.

## DUO-RAKE™

One side furrows and the top side smooths. The entire rake floats!

- ▶ 15" (38 cm) high-impact plastic head.
- ▶ Now with new stronger, gusset-reinforced high-impact plastic head.
- ▶ Bolt and cone (included) is all you need for assembly.

## ECONOMY

Full size performance for smaller-sized budgets.

- ▶ 48" (122 cm) wooden or 54" (137 cm) ultralight, plastic-coated steel handles
- ▶ Tough, high-impact 15" (38 cm) molded head (and handle).

## CART RAKE

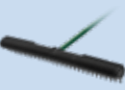

When weight is the issue, the Cart Rake is the lightest you'll find.

- ▶ Impact-resistant, 15" (38 cm) polyethylene molded head.
- ▶ Redesigned neck for added strength and durability.
- ▶ 48" (122 cm) wooden handle.
- ▶ Perfect for golfers to carry.
- ▶ Fits in most golf carts!

# IF IT STICKS TWISTS OR LEANS IT'S NOT A SMART-FIT

## INTRODUCING MAGNATECH™

In 2020, we began making all Standard Golf aluminum cups with our new MagnaTech™ Aluminum Blend. A proprietary blend with more silicone and less copper. Our MagnaTech™ Aluminum is stronger than previous versions and has less corrosive tendencies.

Standard Golf's ST2000 Smart-Fit™ Cups come with three configurations: aluminum, plastic and "hybrid" with an aluminum base and plastic molded walls to combine the best of our aluminum and plastic models.

## BEST VALUE

Set of 18 Cups + 1 Cup Setter

Standard Golf's Aluminum ST2000 Smart-Fit™ cup, MagnaTech™ Budget Cup, and Aluminum Cup are each available in sets of 18 cups with 1 cup setter for the best value.

# 400 DENIER VS. 200 DENIER FLAG FACTS:

## FACT #1

Sometimes less is more. 400 denier is relatively new to the industry and typically used on sailboats.

## FACT #2

The purpose of a golf flag is to show where the cup is and to help golfers judge wind speed. It takes a 7 to 10 mph wind to get a 400 denier flag waving. It takes a 3 to 5 mph wind to get a 200 denier flag waving. Advantage: 200 denier. Plus, the heavier 400 denier flag wears out ferrules flagsticks and cups quicker.

## FACT #3

Golf flags are meant to fly. Sails are meant to propel sailboats. One has nothing to do with the other. So trust us when we tell you the only time we recommend 400 denier is usually when we're talking to sailors, not superintendents.

**BEST WAY TO FLY!**

Standard Golf's special quad-stitch process ensures a more durable flag that flies true in any wind. Look at the difference! Four rows of stitching instead of two, and wider edges that reduce wear.

**STANDARD GOLF'S QUADRUPLE-STITCHED BORDERS**

# SUPERINTENDENTS & PLAYERS ARE NOTICING A DIFFERENCE WITH GREENACTIVATOR

MORE ROOT MASS, IMPROVED STRESS TOLERANCE, INCREASED  
SOIL MICROBIAL ACTIVITY & MORE SOIL-AVAILABLE NITROGEN  
**BACKED BY SCIENCE.**

"With GreenActivator, I've noticed much lusher fairways. **For me, it was like mowing on a cloud because the grass was standing up.** The grass is thicker, but not higher, so the ball sits up better for golfers and improves playability. I get positive comments from golfers constantly."

**Scott Rohlfsen**

Jesup Golf & Country Club  
Jesup, Iowa

**WHY GREENACTIVATOR™?**

Your livelihood depends on a consistently great playing experience. Your pride drives you to achieve a great looking course. Score both with the holistic - above and below ground - turf health boost from GreenActivator. By enhancing root mass with GreenActivator you achieve greater water uptake and greener, overall healthier grass that delivers a great golf course experience. GreenActivator was developed using a patented extraction process and proprietary blend of naturally sourced humic and fulvic acids, plus NPK. This unique technology has been tested for more than a decade to prove plant and soil health benefits.

**GREENACTIVATOR™**

- ▶ Sourced naturally from leonardite coal.
- ▶ Delivered in a liquid, "plant ready" form.
- ▶ Enters plant in less than 30 minutes.
- ▶ Increase turf/plant health by enhanced root growth and better soil health.
- ▶ Less turf disease, increases drought tolerance, increased nutrient uptake.
- ▶ Lower application rates can be combined with other applications to save money.
- ▶ Proprietary blend of Humic, Fulvic and 14-4-2 NPK
- ▶ USDA research proves & on-course use confirms results.

2.5 Gallon (9.5 Liters)	30002	<b>\$299.00</b>
1 Gallon (3.8 Liters)	30000	<b>\$125.00</b>

**ACCORDING TO ADAM THOMS, PH.D., HIS IOWA STATE RESEARCH HAS CONFIRMED THAT ADDING HUMIC ACID RESULTS IN:**

**MORE ROOT BRANCHING**

which means better water absorption, better nutrient uptake and increased drought resistance

**INCREASED MICROBIAL ACTIVITY**

which results in a healthier soil and root zone

**IMPROVED STRESS TOLERANCE**

that equates to faster recovery from turf damaged by traffic, divots, or ball marks

**MORE SOIL-AVAILABLE NITROGEN**

enabling the reduction of synthetic nitrogen by 25%

**NATURALLY HEALTHIER TURF THROUGH BETTER ROOT DEVELOPMENT**

Iowa State University's (ISU) turf management team led by Adam Thoms, Ph.D., and, at the time, grad student Aj Lindsey, Ph.D., now an Assistant Professor at the University of Florida, have been studying humic acids on turf for years and in 2021 began incorporating GreenActivator into their research trials. In 2022, several other universities throughout the US are scheduled to begin research as well.
